Traveling

## experience

### Full Stack Web Developer

General Assembly | Mar 2017 - June 2017

#### FlyLab

- Built a SEAN full stack application that uses USGS, Google Maps, and Weather API data. RESTful and CRUD functionality
- Project lead with a team of three developers
- Developed skills in Angular 1, Sequel, Satellizer, Chart JS, Request, and Bootstrap to develop the app
- Integrated mapping locations with multiple API data calls. Saved coordinates to the database for a user

#### Songify

- Built a MEAN full stack application that uses Spotify API data
- The app allows users to generate custom Spotify playlists and saves user data into a database
- Developed skills in Mongo, Mongoose, Node, JQuery, Express, Ajax, and Bootstrap to develop the app
- Designed the full stack project with many scalable opportunities for the future

### Technical Specialist

PSAV | Nov 2013 - Mar 2017

- Project Manager for show production and client interaction
- Designed and produced shows and events for hotels in CAD
- Hotel customer service skills for vendors and third party clients
- Managed teams that built and operated events
- Specialized in audio and video design/setup/operation

### Data Sanitization Technician

Lifespan | Aug 2008 - Nov 2013

- Client data destruction of computer/network/server equipment
- Bug testing development for database design
- Managed a team that completed data sanitization project

## education

### Web Development Immersive Bootcamp

General Assembly | 2017

### Masters in Recording Arts

University of Colorado Denver | 2011-2013
